Make a ball-star ornament

1. **Cut** out 6 circles from heavy weight paper
 - For smaller ornaments, use circle paper punch
 - For larger ornaments, trace a round object, such as a yogurt pot, and cut out the circle
2. **Fold** 5 circles in half (leave one unfolded)
3. **Cut** a slit in the middle - stopping 1/4 inch or more from the end
4. **Slide** these 5 circles onto the remaining circle
5. **Punch** a hole in the end of one circle
6. **Thread** string, ribbon, or yarn through this hole - one becomes an ornament, and multiple can be strung together for a garland

It will look like a ball from some angles and a star from other angles!
